PROFESSIONAL SUMMARY

AI Automation Engineer with 5+ years of Software Quality Assurance experience, specializing in intelligent workflow automation using n8n and Generative AI technologies. Built end-to-end AI automation solutions integrating LLMs, AI Agents, RAG architectures, and multimodal AI to streamline business processes, improving operational efficiency. Proven expertise in leveraging tools like Google Gemini, Groq, and open-source models to design scalable, cost-effective AI solutions. Strong foundation in system understanding and quality-first engineering practices, transitioning complex requirements into reliable automated pipelines.

TECHNICAL SKILLS

- **AI & Workflow Orchestration:** n8n, AI Agents, Prompt Engineering, Human-in-the-Loop, Workflow Orchestration
- **Large Language Models:** Google Gemini, OpenRouter, Groq, Ollama, Hugging Face
- **Generative AI & Multimodal:** Together AI (FLUX), Text-to-Image, Speech-to-Text, ElevenLabs, Speechify
- **RAG & Vector DBs:** Retrieval-Augmented Generation (RAG), Pinecone, Qdrant, Semantic Search
- **APIs & Development:** REST APIs, JSON, Webhooks, JavaScript (n8n Code Nodes), Java, Git, GitHub
- **Databases & Cloud:** Supabase, Baserow, Render, Hugging Face Spaces
- **Integrations:** Telegram, WhatsApp, LinkedIn, Slack, Gmail, Google Drive, Shotstack
- **QA & Testing:** Manual/Functional Testing, Regression Testing, Smoke Testing

SELECTED AI AUTOMATION SOLUTIONS (n8n & AI Pipelines)

Intelligent Manual Test Case Generator

- Engineered a unified n8n workflow utilizing Gemini Vision and Mistral OCR to process Jira tickets, screenshots, and text significantly reducing manual effort in test case creation.
- Automated the generation of structured positive, negative, and edge test cases, delivering project-specific Google Sheets directly via Gmail.
- **Tech Stack:** n8n, Gemini Vision, Mistral OCR, Jira API, Google Sheets, Gmail.
- **Technical Documentation:** [Intelligent Manual Test Case Generator](#)

AI Website Quality Audit Platform

- Developed a Playwright + TypeScript crawler orchestrated by n8n to perform exploratory quality checks and validate UI/accessibility across websites.
- Integrated Groq AI Agents to analyze audit results and automated the delivery of interactive HTML reports via Google Drive, cutting audit reporting time by 60%.
- **Tech Stack:** n8n, Playwright, TypeScript, Groq, Google Drive API, Supabase.
- **Technical Documentation:** [AI Website Quality Audit Platform](#)

RAG Knowledge Assistant

- Built a document ingestion pipeline monitoring Google Drive to chunk, embed, and index documents into a Qdrant Vector Database.
- Deployed AI Agents utilizing semantic search to provide context-aware responses from private data.
- **Tech Stack:** n8n, Qdrant, Hugging Face Embeddings, Groq LLM, AI Agents, RAG.
- **Technical Documentation:** [RAG Knowledge Assistant](#)

Lead Generation & AI Outreach Automation

- Created a Python + Playwright service integrated with n8n to scrape and enrich business lead data based on user-defined criteria.
- Leveraged Generative AI to draft personalized cold emails, automating data storage in Supabase.
- **Tech Stack:** n8n, Python, Playwright, Google Gemini, Supabase, Gmail.
- **Technical Documentation:** [Lead Generation & AI Outreach Automation](#)

LinkedIn Content Automation Platform

- Automated daily role-specific content and image creation using LLMs and Together AI (FLUX).
- Implemented a Telegram-based Human-in-the-Loop workflow for content approval. This reduced content creation time while ensuring quality control.
- **Tech Stack:** n8n, OpenRouter, Together AI, Telegram, LinkedIn API.
- **Technical Documentation:** [LinkedIn Content Automation Platform](#)

AI Shorts Video Generation Pipeline

- Designed a multimodal pipeline integrating Together AI, Gemini TTS, and Shotstack to transform text into fully rendered short videos.
- Implemented loop-based scene processing to automatically generate, merge, and deliver video clips via Telegram.
- **Tech Stack:** n8n, Gemini, Together AI, Shotstack, Telegram.
- **Technical Documentation:** [AI Shorts Video Generation Pipeline](#)

PROFESSIONAL EXPERIENCE

QA Automation Engineer | Yen Digital Technologies Pvt. Ltd. | Sep 2021 – Present

- Designed and implemented internal AI automation initiatives using n8n, including AI-assisted test case generation and RAG-based knowledge retrieval, saving several hours of manual effort weekly.
- Engineered automation workflows for document processing and website data extraction, improving engineering productivity through workflow automation.
- Integrated LLMs, REST APIs, and cloud-hosted AI services into internal workflows to streamline template validation and reduce repetitive testing tasks.
- Developed and maintained UI automation frameworks for enterprise applications using Selenium, Playwright, and Java, achieving 90% test coverage.
- Collaborated with cross-functional Agile teams to validate business requirements and automate regression testing.

ACHIEVEMENTS

- Received the "Trailblazer" Recognition Award for prototyping cost-effective AI automation demos and leading knowledge-sharing sessions to promote AI adoption across engineering teams.

EDUCATION

Diploma in Computer Science & Engineering | Board Of Technical Education | 2013
